

Reading Discussion

What is Data visualization for?

Making things Easy to register

Giving an insight / Spread an idea

Power of Datavisualization

Lasting Long

Approachable

Example 1 - system map

give an idea about what's going on systematically -> giving an idea

art as data viz -> **spread a message**

Counter Argument

Lasting Long

words last longer but viz initiates it collectively

Casting light to the hidden area

Highly tailored information - > creating another bias

Even more complex

Highly tailored information - > creating another bias
